BAXI Duo-Tec the Future is Here

Give your Hydronic Business the Competitive Edge

Baxi's track record for manufacturing leading wallhung boiler technology spans four decades. Now, as other manufacturers continue to enter the category, Baxi innovation presents a significant leap forward in proven, reliable wallhung heating for homeowners and commercial property managers. Field tested throughout North America, the new Baxi Luna Duo-Tec wallhung boiler features a 7:1 modulation ratio, plus gas-adaptive and self-calibrating advances. Up to 98 per cent energy efficient, it is ideal for a range of applications – from in-floor radiant and hydro-air (teamed with a hydronic air handler for both heating and cooling) to high or low temperature radiators and snowmelt systems alike.

1 Day Factory Training **Thursday June 5th - 9 AM - 3 PM** **Walkerton Clean Water Centre**
